IMAGE DATA IN THE FLOW: SIMPLE INTEGRATION INTO YOUR PROCESSES

The TMD Cloud integrates seamlessly into your workflows. Based on the cloud archive, you can add further functions such as data sharing or viewing from the cloud on a modular basis as required. Simply and without a lengthy IT project.

As a **software-as-a-service solution**, the TMD Cloud is quickly ready for use. At the same time, there is no need for time-consuming hardware maintenance and recurring software installations.

In addition, the web-based portal of the TMD Cloud allows you to **access image data from any location**, making it easy to implement cross-location authorization management, for example.

YOUR BENEFITS

- **Flexible use** as image archive, secondary PACS or CD replacement
- **Minimal IT effort** thanks to software as a service solutions
- **Compatible with >30 PACS** and other software applications
- **Interoperable** through standard interfaces (e.g. FHIR)
- **Data protection compliant** thanks to encryption & separate key archive
- **Personal support** from Germany via customer portal, telephone or email

ARCHIVE, SHARE AND VIEW DICOM DATA FROM ANYWHERE

Thanks to the TMD Cloud, you can manage medical image data efficiently and without a lengthy IT project in the cloud. Retrieve medical data independently of applications at any location and allow cloud-based tools such as AI software secure access to image data stored in the cloud.

Sharing DICOM data with patients and referring facilities is also simple thanks to the TMD Cloud.
